PDMP DATA DESCRIPTION

Data were requested and provided by the NH Prescription Drug Monitoring Program for 2019 and 2020. The summary report of medications for opioid use disorder (MOUD) prescriptions represented are the total MOUD prescriptions and number of active prescribers in 2020. The number of active prescribers was determined by those who wrote a prescription for MOUD (buprenorphine or buprenorphine-naloxone) in 2020. The summary report of distinct long acting opiate prescribers, count of prescriptions, and distinct patients prescribed long acting opiates are the total prescribers, prescriptions and distinct patients in 2020.

For each of the five outcomes, the first graph depicts the actual frequency, the second graph displays the rate per 100,000 people. Rate per 100,000 have been calculated for the purposes of comparison across each public health region.
